

ROLE OF STOCKBROKERS

1. Role of Stockbrokers

Who is a Stockbroker?

A stockbroker is a SEBI-registered middleman who helps you buy and sell shares in the stock market.

You cannot directly trade on NSE/BSE—brokers provide the platform and tools.

2. Opening Demat & Trading Accounts

What is a Demat Account?

Stores your shares in electronic form

Works like a digital locker

What is a Trading Account?

Used to place buy/sell orders

Connects you to the stock exchange

Types of Brokers

1. **Full-Service Broker**

- Research reports
- Relationship manager
- Higher brokerage
- Suitable for beginners needing guidance

2. **Discount Broker**

- Low brokerage
- Fast platforms
- No research or RM
- Example: Zerodha, Upstox
- Most traders prefer this

- Step:2 Search the company you want and again click on the + sign

- And like this your stock will be added to your watchlist

Types of Orders

1. **Market order**

- Buys/sells immediately at current market price
- Used in fast-moving markets
- No price control

2. **Limit order**

- You specify the exact price
- Order executes only if price comes there
- Used when you want price control

3. Stop Loss (SL) Order

- Protects you from loss
 - Automatically exits your trade when the price hits the SL level
-
- **Types of SL Orders:**
 - SL (Stop Loss) → Trigger price + Limit price
 - SL-M (Stop Loss Market) → Trigger price only

Long vs. Short Positions

1. Long Position (Buy First, Sell Later)

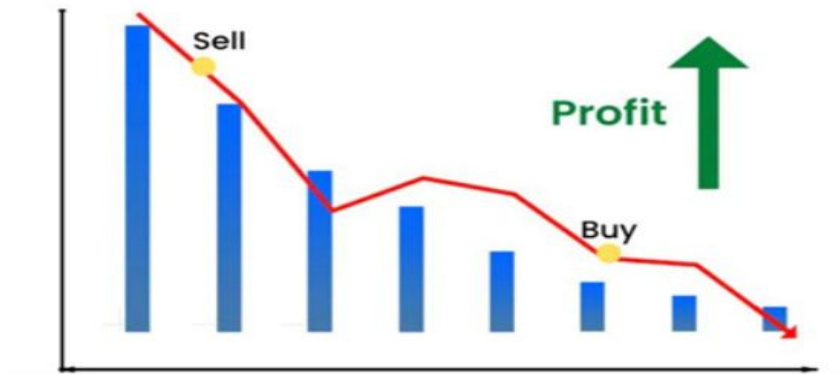

- You expect price to go up
- Profit = Sell Price – Buy Price

2. Short Position (Sell First, Buy Later)

- You expect price to go down
- Profit = Sell Price – Buy Price
- Shorting is allowed only in intraday for stocks (India)

Short

What is Leverage?

What is leverage/Margin?

Leverage refers to the use of debt (borrowed funds) to amplify returns from an investment or project. Investors use leverage to multiply their buying power in the market.

Market Depth
